Medisoft Version 14 Now Available

Get the latest version of the practice management system that helps more than 70,000 providers to increase cash flow and improve office productivity and efficiency every day. Medisoft Version 14 (v14) is now available, and it includes something for everyone. Current customers will want to upgrade to Medisoft v14 for new features including Patient Quick Entry, the Administrative Dashboard and Scheduled File Maintenance. The UB-04 feature will enable providers such as hospice centers, nursing homes and rural health clinics to use Medisoft to file the required UB-04 insurance claim. And surgeons, dermatologists and other providers who see patients after surgery can use the Global Days feature to handle billing requirements for post-op procedures.

NEW FEATURE REVIEW

** Features marked with an asterisk are available in the Advanced and Network Pro Editions, but are not included in the Basic Edition.*

☒ **Patient Quick Entry:**

- Set customizable templates for faster data entry of Patient/Case data.
- Set Required fields for more consistent and accurate information required to reduce claim rejections.
- Ability to create multiple templates for entering specific requirements based on circumstances.

☒ **Administrative Dashboard:**

- View multiple aspects of the practice data from one area.
- View what users are logged in and their activity.
- See instant totals of A/R, claims, statements, appointments with multiple filter options.
- View Trending graphs of production over time – daily, weekly, monthly, quarterly, annual, etc.
- Set maximum values on the status of data such as Appointments and A/R to trigger alert warnings.

☒ **UB-04 Functionality:**

- Includes UB-04 fields for data entry- UB04 fields are numbered and labeled
- Six new UB04 code sets
- Paper printing options will include "with form" format and a UB04 print image

☒ **Global Days:**

- Procedures codes can be set as a global type with settings for the global period.
- The global coverage alert shows on the transaction entry screen.
- When transactions are entered within the global period, the amount will default to zero.

☒ **More New Features:**

- Mediutils with Power Tools- can now change procedure codes, chart numbers, and insurance codes.
- Task scheduler- schedule file maintenance to run at any given time when system is not in use.
- Deposit list is no longer locked - maneuver anywhere in MediSoft with the deposit list screen open
- More flexible Import/Export options for data and custom screens
- Option setting to allow eight diagnosis codes in case

... and much more!
